

Building Trust Through **Privacy**

Reimagining YouTube's Data Consent Experience for DPDP Act 2023

Vedantu Product Management Assignment

| The Problem: Consent Fatigue

User Journey

Step 1: User opens the app.

Step 2: Confronted with "Accept All" pop-up.

Step 3: Skips reading legal jargon.

Step 4: Data collected without true understanding.

Step 5: **Low trust** ecosystem created.

Pain Meter

 Transparency: 2 / 5

 User Control: 1 / 5

 User Trust: 2 / 5

"Privacy should be understandable—not hidden."

| User Persona: Rahul (22)

"I just want to watch videos."

Daily Usage: 3 hrs/day (Learning & Entertainment)

Frustrations: Doesn't understand complex settings; feels unsure about data usage; clicks 'Accept' to save time.

Empathy: He values recommendations but fears losing control over his watch history.

| Current Experience: Risk Matrix

Risk Dimension	User Risk	Business Risk
Trust	Confusion & Mistrust	User Churn & Negative Brand
Compliance	Involuntary Consent	DPDP Penalties (Up to ₹250 Cr)
Control	Data Misuse Fear	Decreased High-Value Engagement

| Solution: The Privacy Hub

-  **Privacy Score:** Gamified metric of safety.
-  **Download Data:** One-tap archival rights.
-  **Manage Consent:** Granular control over tracking.
-  **Parent Controls:** Specialized DPDP child protection.

| Product Flow: Trust-First Interaction

Launch

Intro splash explaining benefits of new privacy controls.

Permissions

Granular purpose-specific toggles (Informed Consent).

Dashboard

Centralized hub to view and revoke permissions at any time.

Control

Confirmation of data rights and DPDP compliance.

| Success Metrics: The Trust Lift

Significant increase in **Valid Consent Completion**

| The North Star Metric

95%

Active Users with Valid Informed Consent

Retention

Guardrail Metric

Watch Time

Stability KPI

Trust Score

User Sentiment

| PM Case: If Consent Drops 15%?

| **HYPOTHESIS 1: UI Friction**

Check funnel drop-off at the "Detailed Permissions" screen. Experiment: Split UI into 2 steps.

| **HYPOTHESIS 2: Backend Failure**

Analyze API response time for the Consent Manager. Investigation: Check P99 latency.

| **HYPOTHESIS 3: Notification Fatigue**

Check CTR on the privacy opt-in nudge. Data: Compare by user region/device.

| Rollout Strategy

| Risks & Trade-offs

Engineering

High Complexity: Real-time consent linking with data processors.

Business

Revenue Risk: Opt-outs might affect personalized ad efficiency.

Legal

Critical: Zero margin for error in DPDP compliance.

"Privacy isn't just compliance—it is a product experience that earns trust."

Takeaways:

User-first Design • DPDP Compliant • Trust by Design • Zero Friction

Thank You
